	regarding Development on Slopes over 25 degrees and Construction in the Floodplain, Section
	33.340 Slopes Limits and Section 33.344 Drainage.
	a. Staff Presentation
	Barbara Wilson, City Administrator, details the application for variance including the
	letter from the City Engineer, plats, and pictures. This path would serve as a safe route
	to get people and equipment to the boat dock.
	b. Applicant Presentation
	Rick Remore, Authorized Agent for the Applicant, states that their hope is to create a
	5'10" wide path that would bring the impervious cover total for the property to 20%. This path would allow people to safely access the water with a golf cart.
	c. Citizen Comments
	None.
	Commissioner Judy Barrick makes a motion to approve the variance with the correction to the impervious cover percentage on the plat and the conditions on the
	plat for future development would be followed. Seconded by Alternate Nancy Carufel

New Direction from Council

The Planning and Zoning Committee should:

- 1. Continue to Develop the Comprehensive Plan utilizing the Survey Results
 - a. Use Kristi Belote's analysis of our recent and past survey
 - Use David Springer's update to baseline Section Two and work with Bill Connors
- 2. Develop a group of stakeholders to give information, perspective, and input to the Planning and Zoning Commission as they work on the Comprehensive Plan. Note: This would not be a separate committee with separate meetings, but instead a group of interested parties that would attend Planning and Zoning meetings to give their input.
- 3. Planning and Zoning Commission will update the Existing Land Use Map
 - a. Design a methodology (possibly a survey) to establish how property owners are currently using their property, and how they would like to use their property in the future.
 - b. Bill Connors and David Springer will develop a starting point map from the TCAD data and mapping already in use.

Overall plan is to have a parallel process where the Planning and Zoning Commission works on the Comprehensive Plan and Council works on the ordinances, starting with zoning.

One of the goals of this process to gather as much input from residents, stakeholders, and property owners via targeted surveys run through the Public Relations and Communications Committee and Council. The Public Relations and Communications Committee will handle all of the surveys, email blasts, and newsletters. Town Hall Meetings will be scheduled and planned by Council, with publication done by the Public Relations and Communications Committee.
